

1. Describe in detail AGILE and Fermi/LAT and their data sets
  2. Highlight some of the main results of both missions
  3. Describe the analysis procedures for AGILE (briefly)  
they are here: <http://agile.asdc.asi.it/public/>
  4. Describe the LAT analysis tools package: <http://fermi.gsfc.nasa.gov/ssc/data/analysis/>
  5. Production of the LAT simulated data with gtobssim  
Download the file:  
[Paris\\_2009\\_Fermi.tar.gz](#)
  6. Perform a likelihood analysis of 3c279 and 3c273 on the LAT simulated data.
