

Rockin' the Solar System: DLR's Institute of Planetary Research

Giordano Bruno † 1600

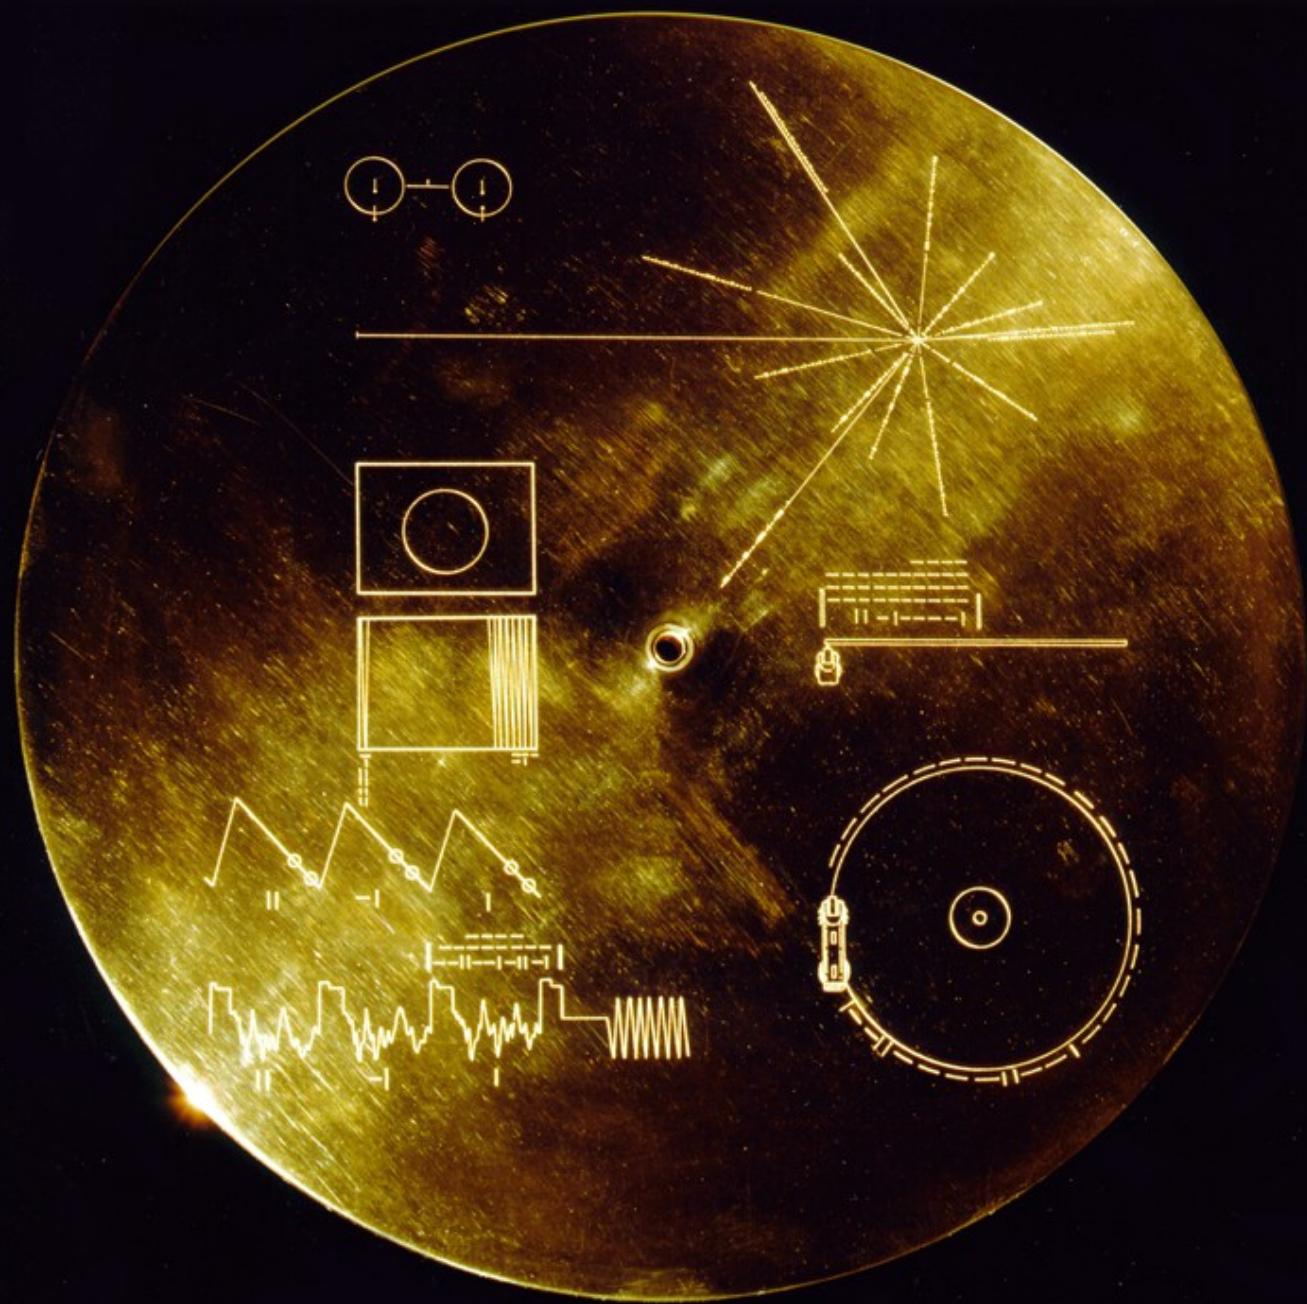

Anybody out there?

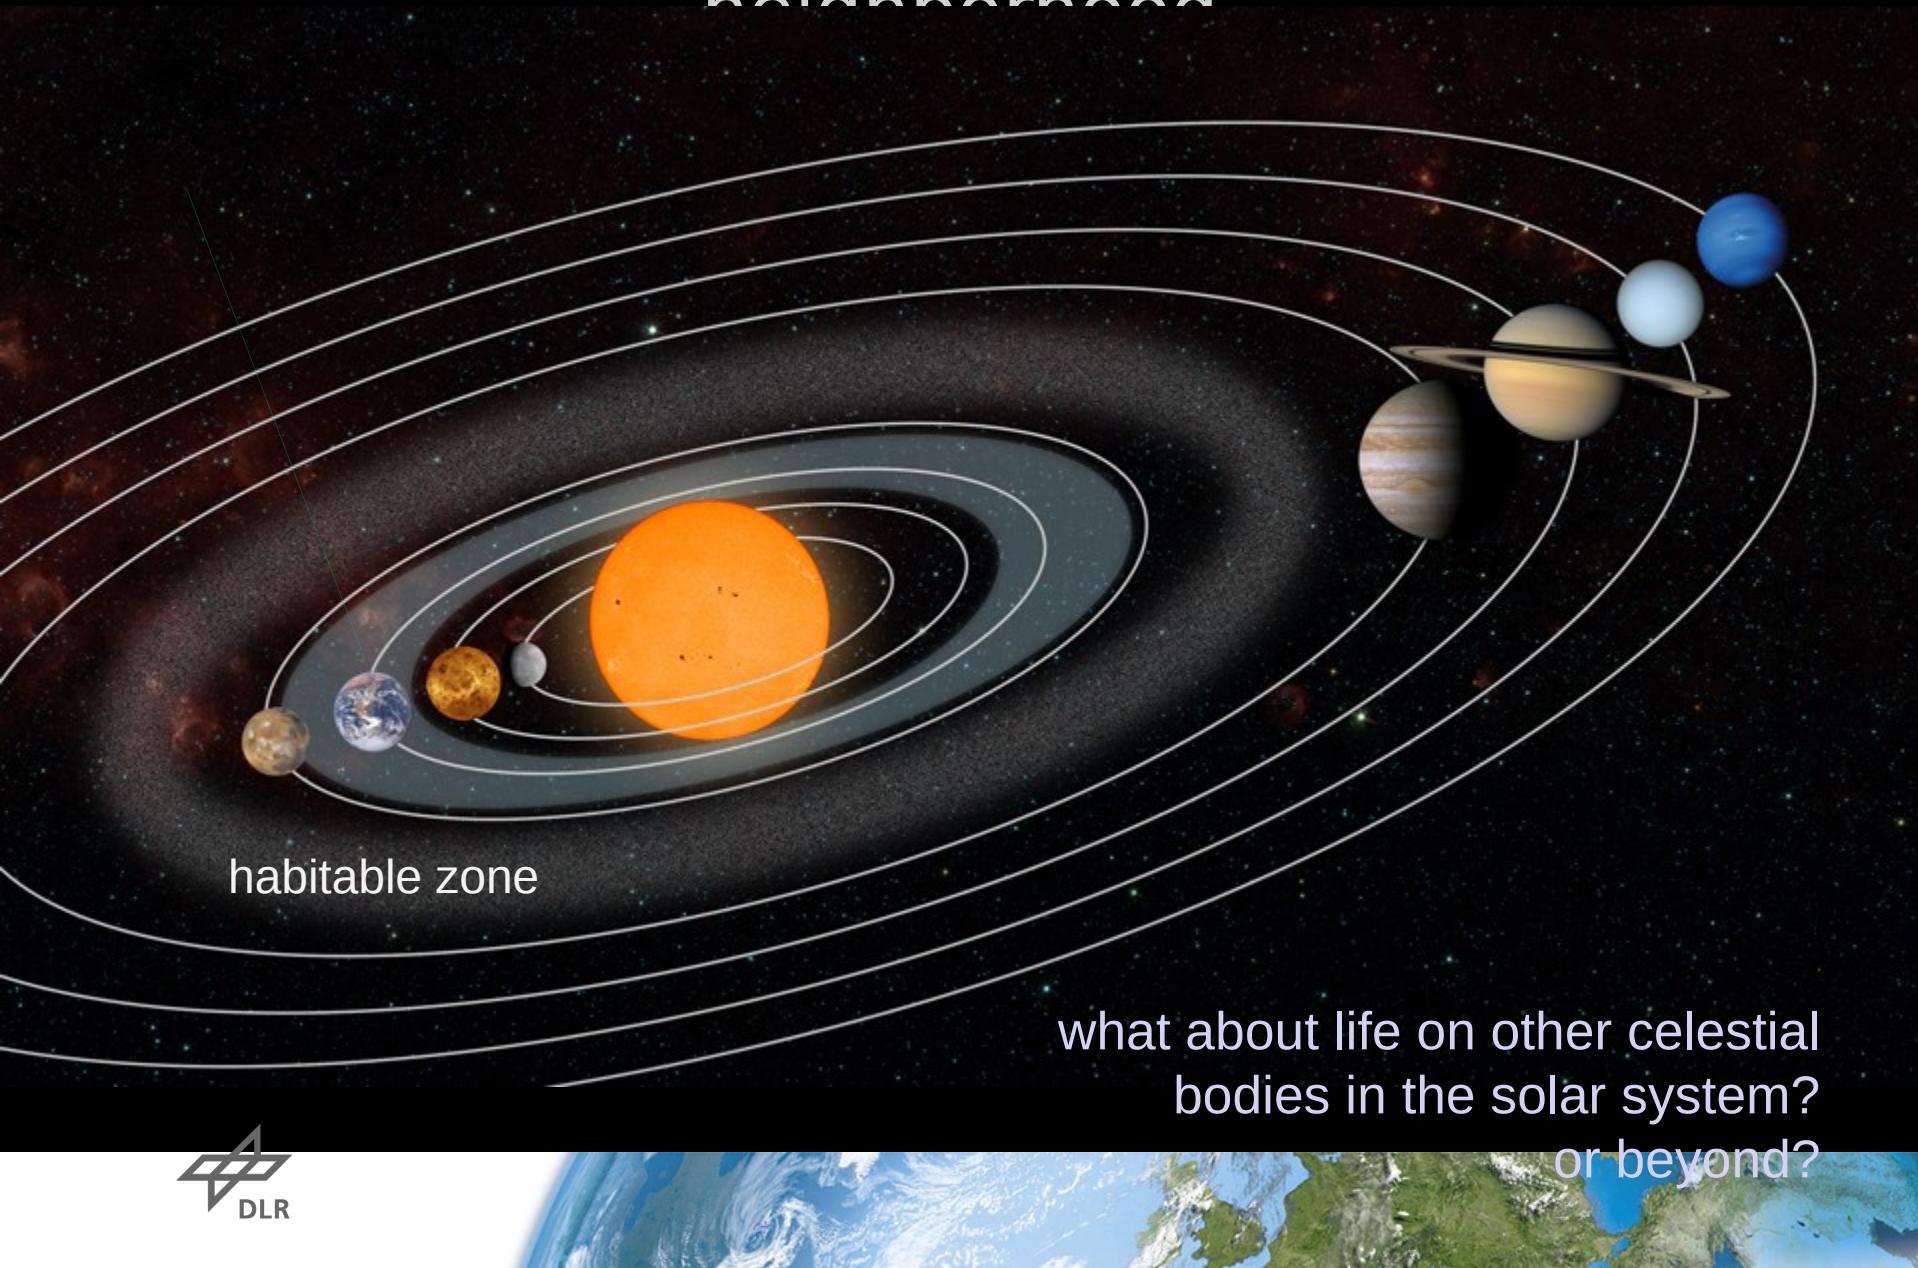

Carl Sagan (1934-1996) and a model of the Viking lander

First look over the fence: Earth's neighborhood

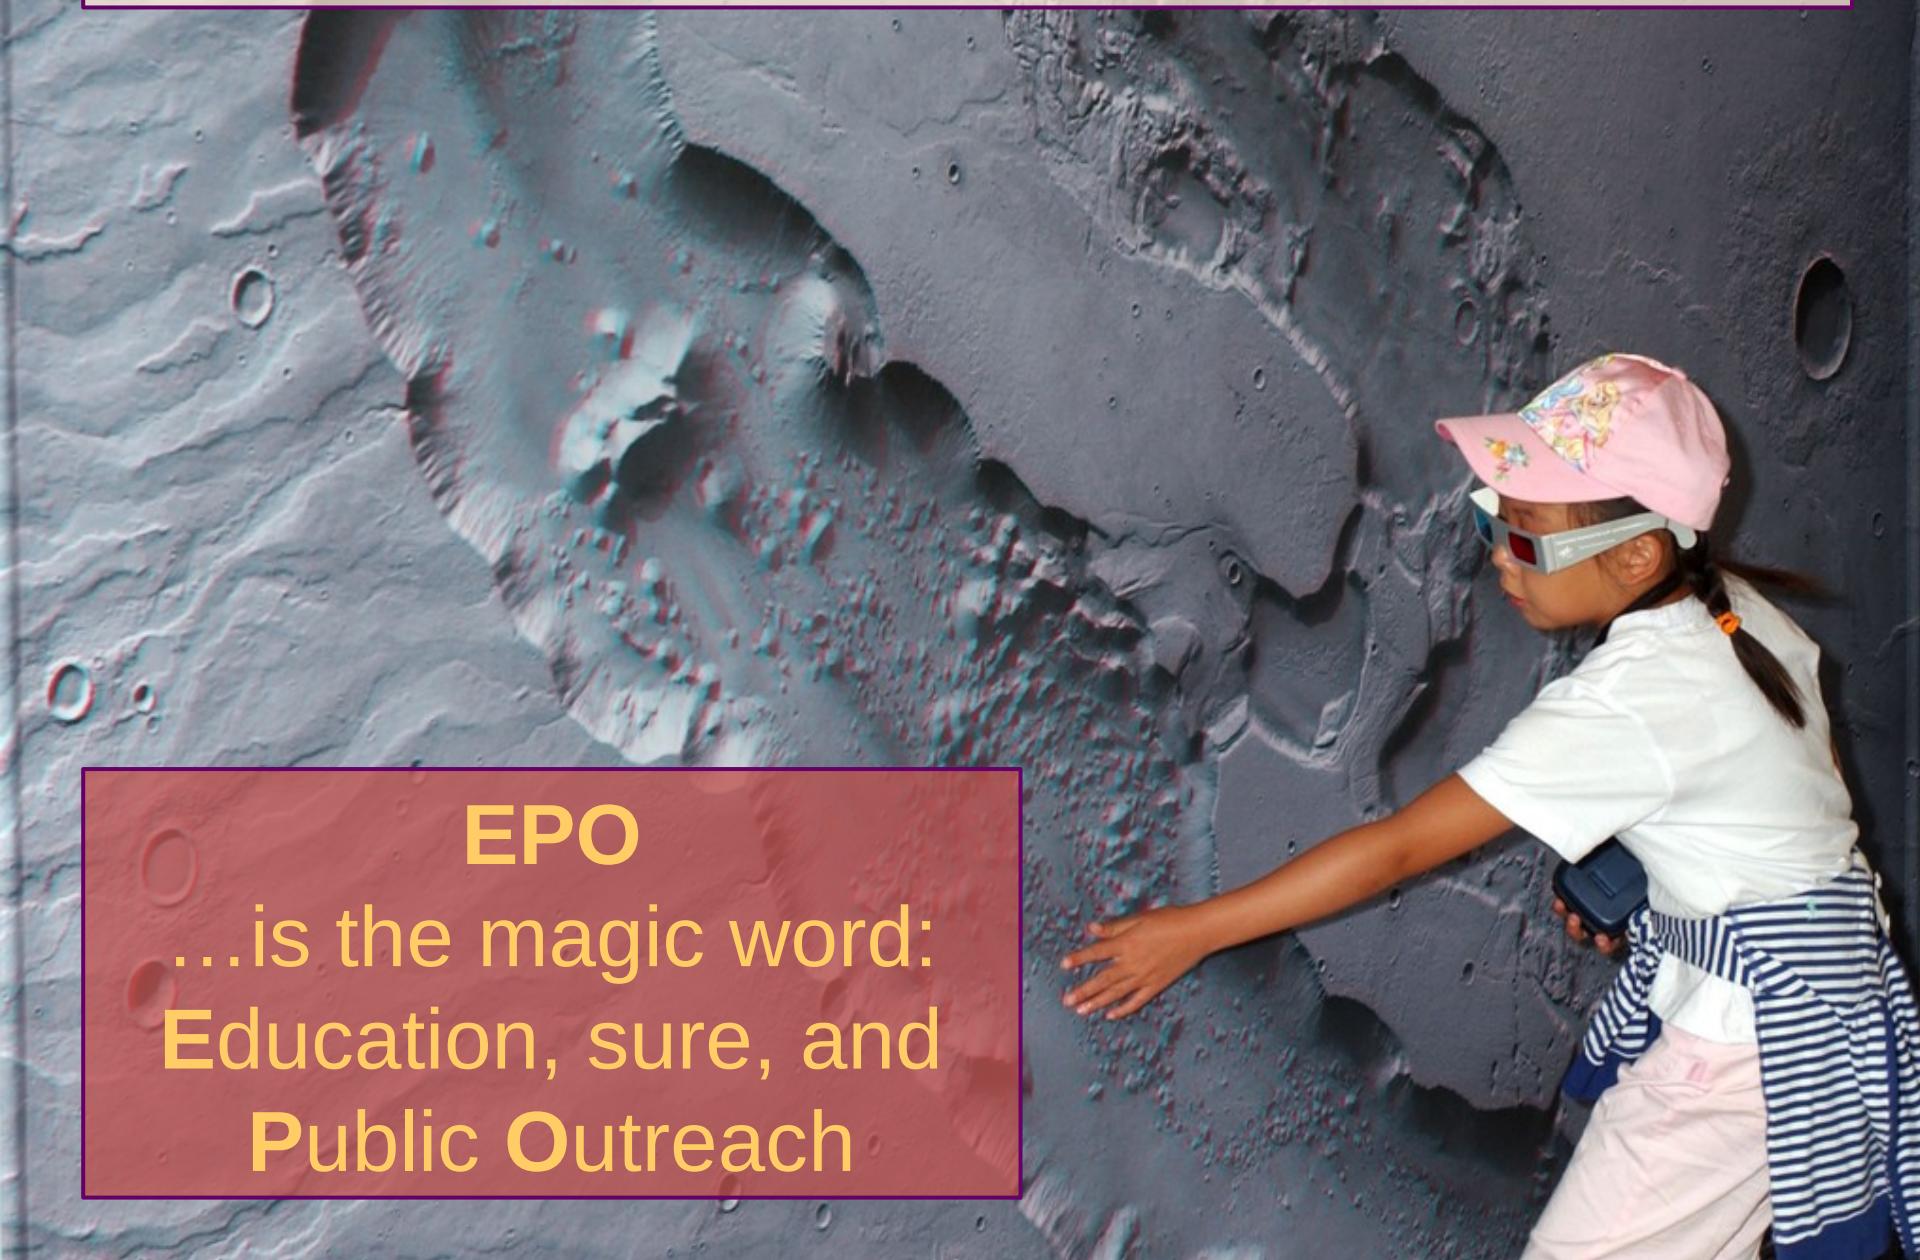

habitable zone

what about life on other celestial
bodies in the solar system?
or beyond?

Dinosaurs, coral reefs, rainforests, volcanoes, stars, planet Mars ...
fascinating worlds – we only have to explore them!

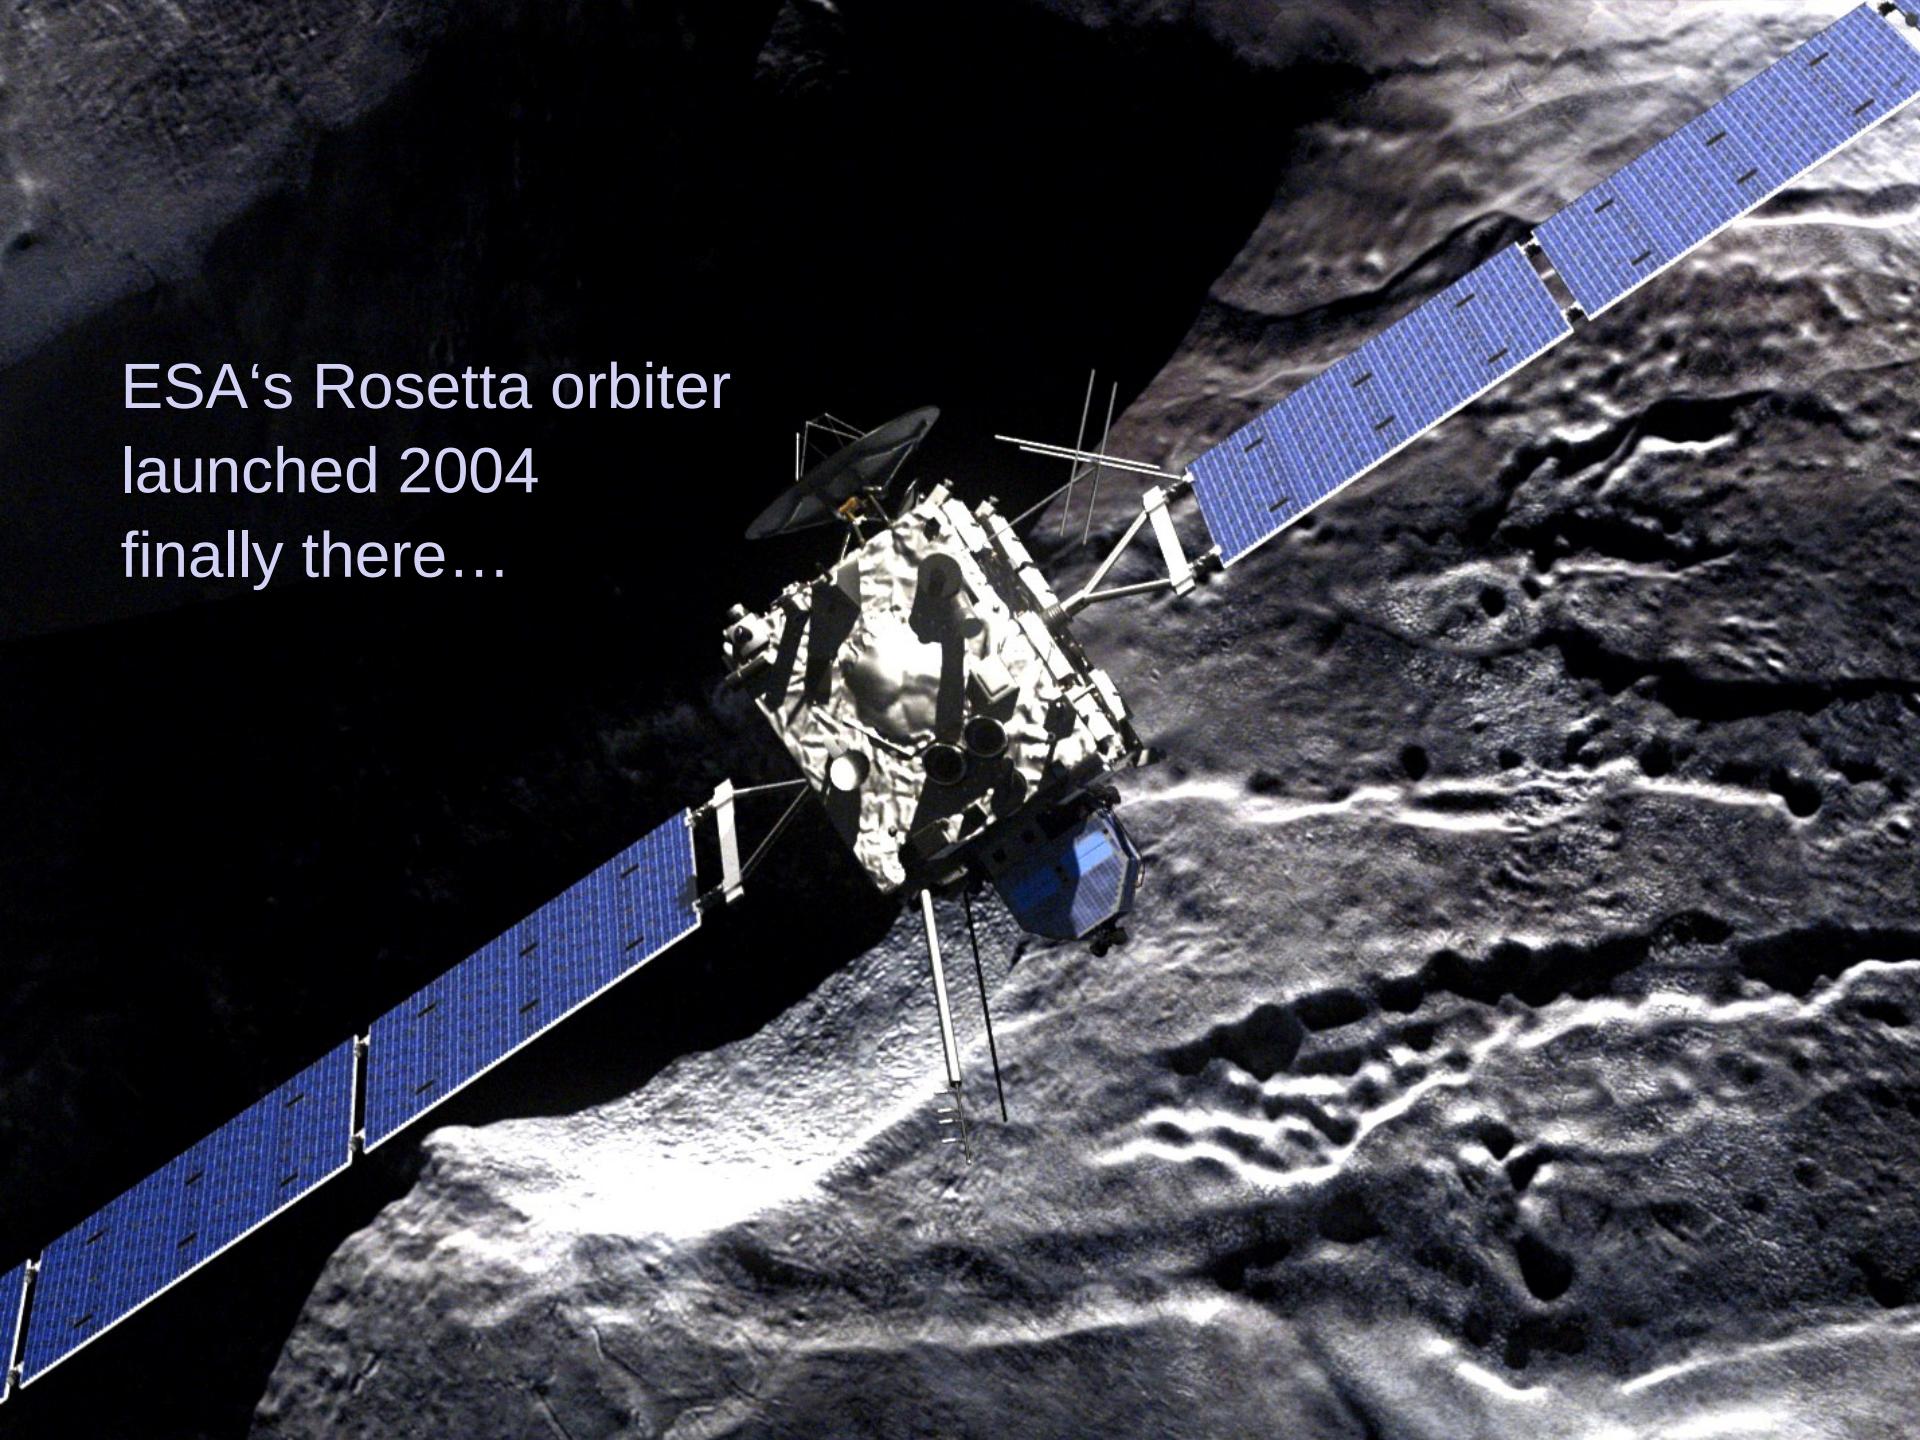

EPO
...is the magic word:
**Education, sure, and
Public Outreach**

European Space Operation Centre
Darmstadt, 20 January 2014, 19.18 MEZ
Rosetta's alarm had rung!

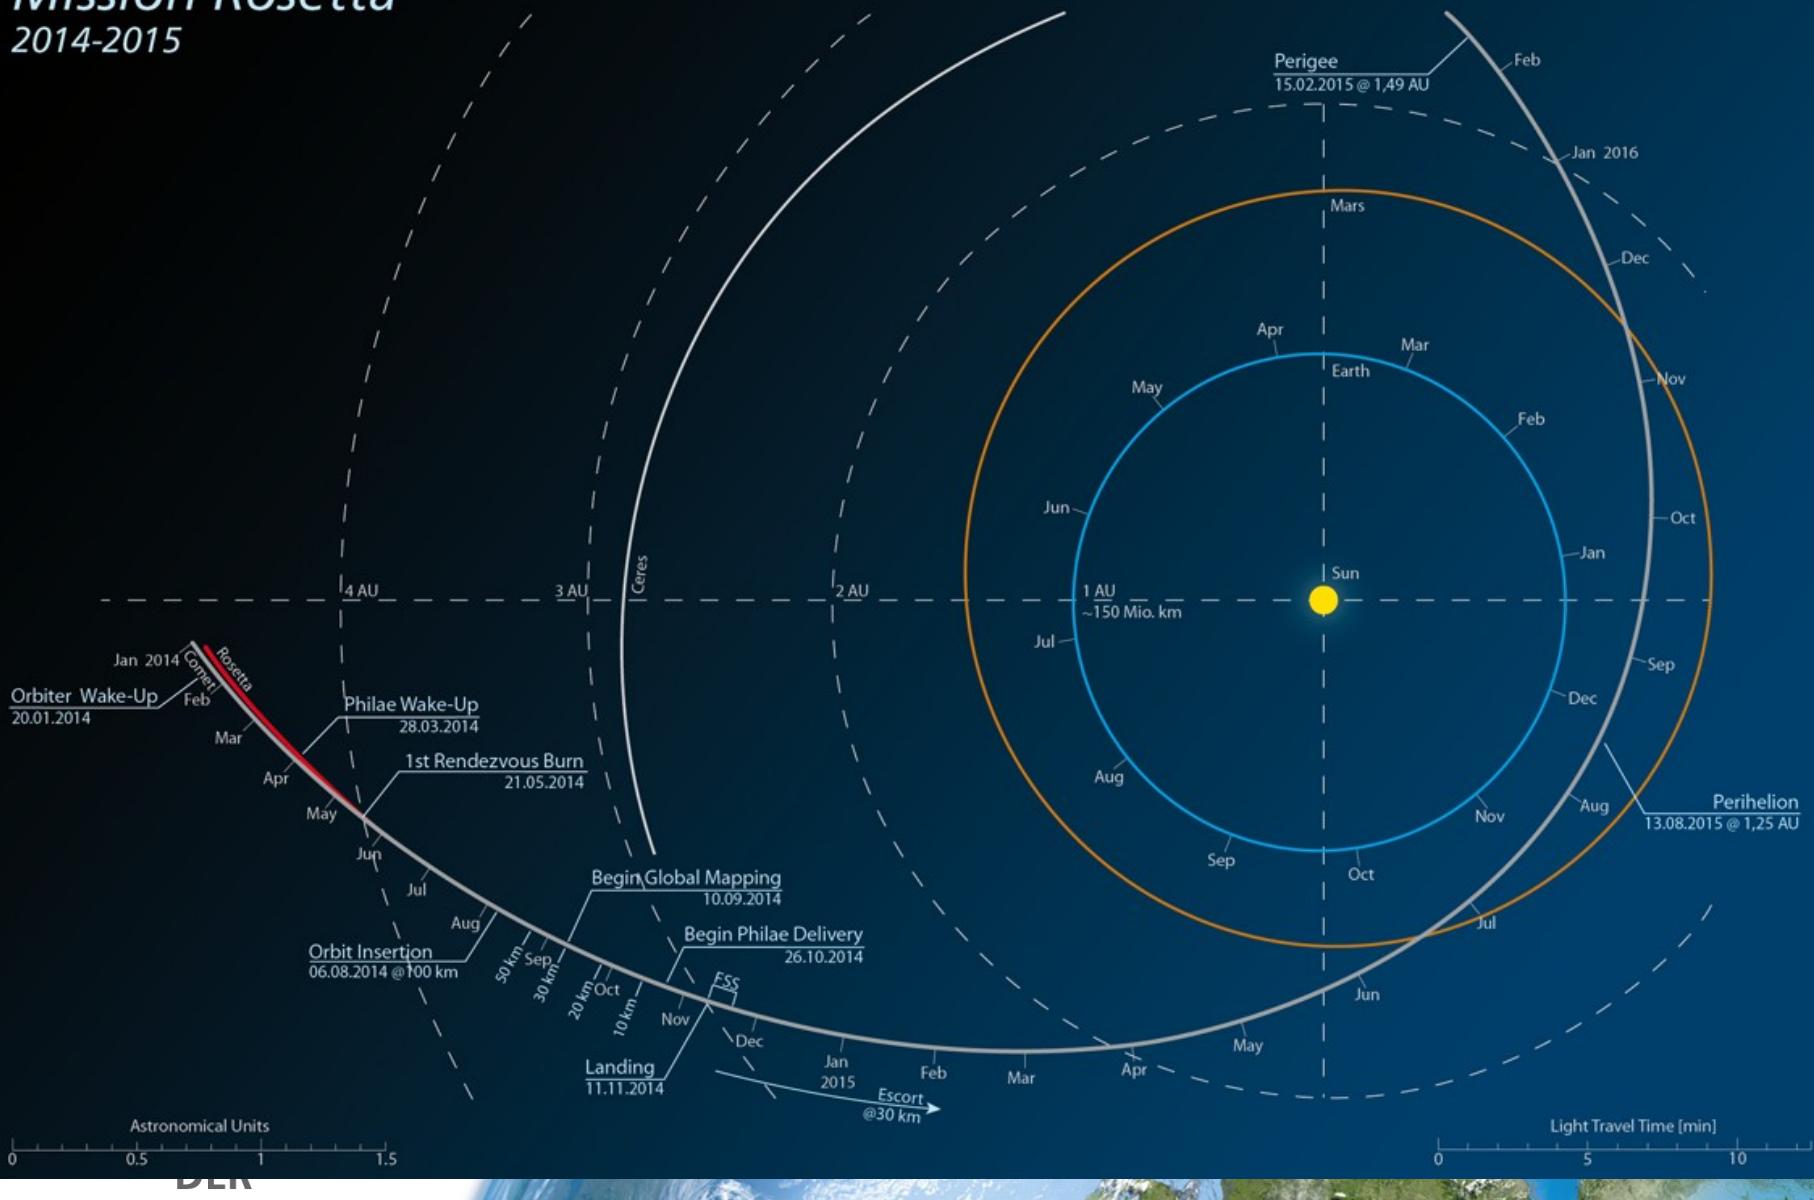

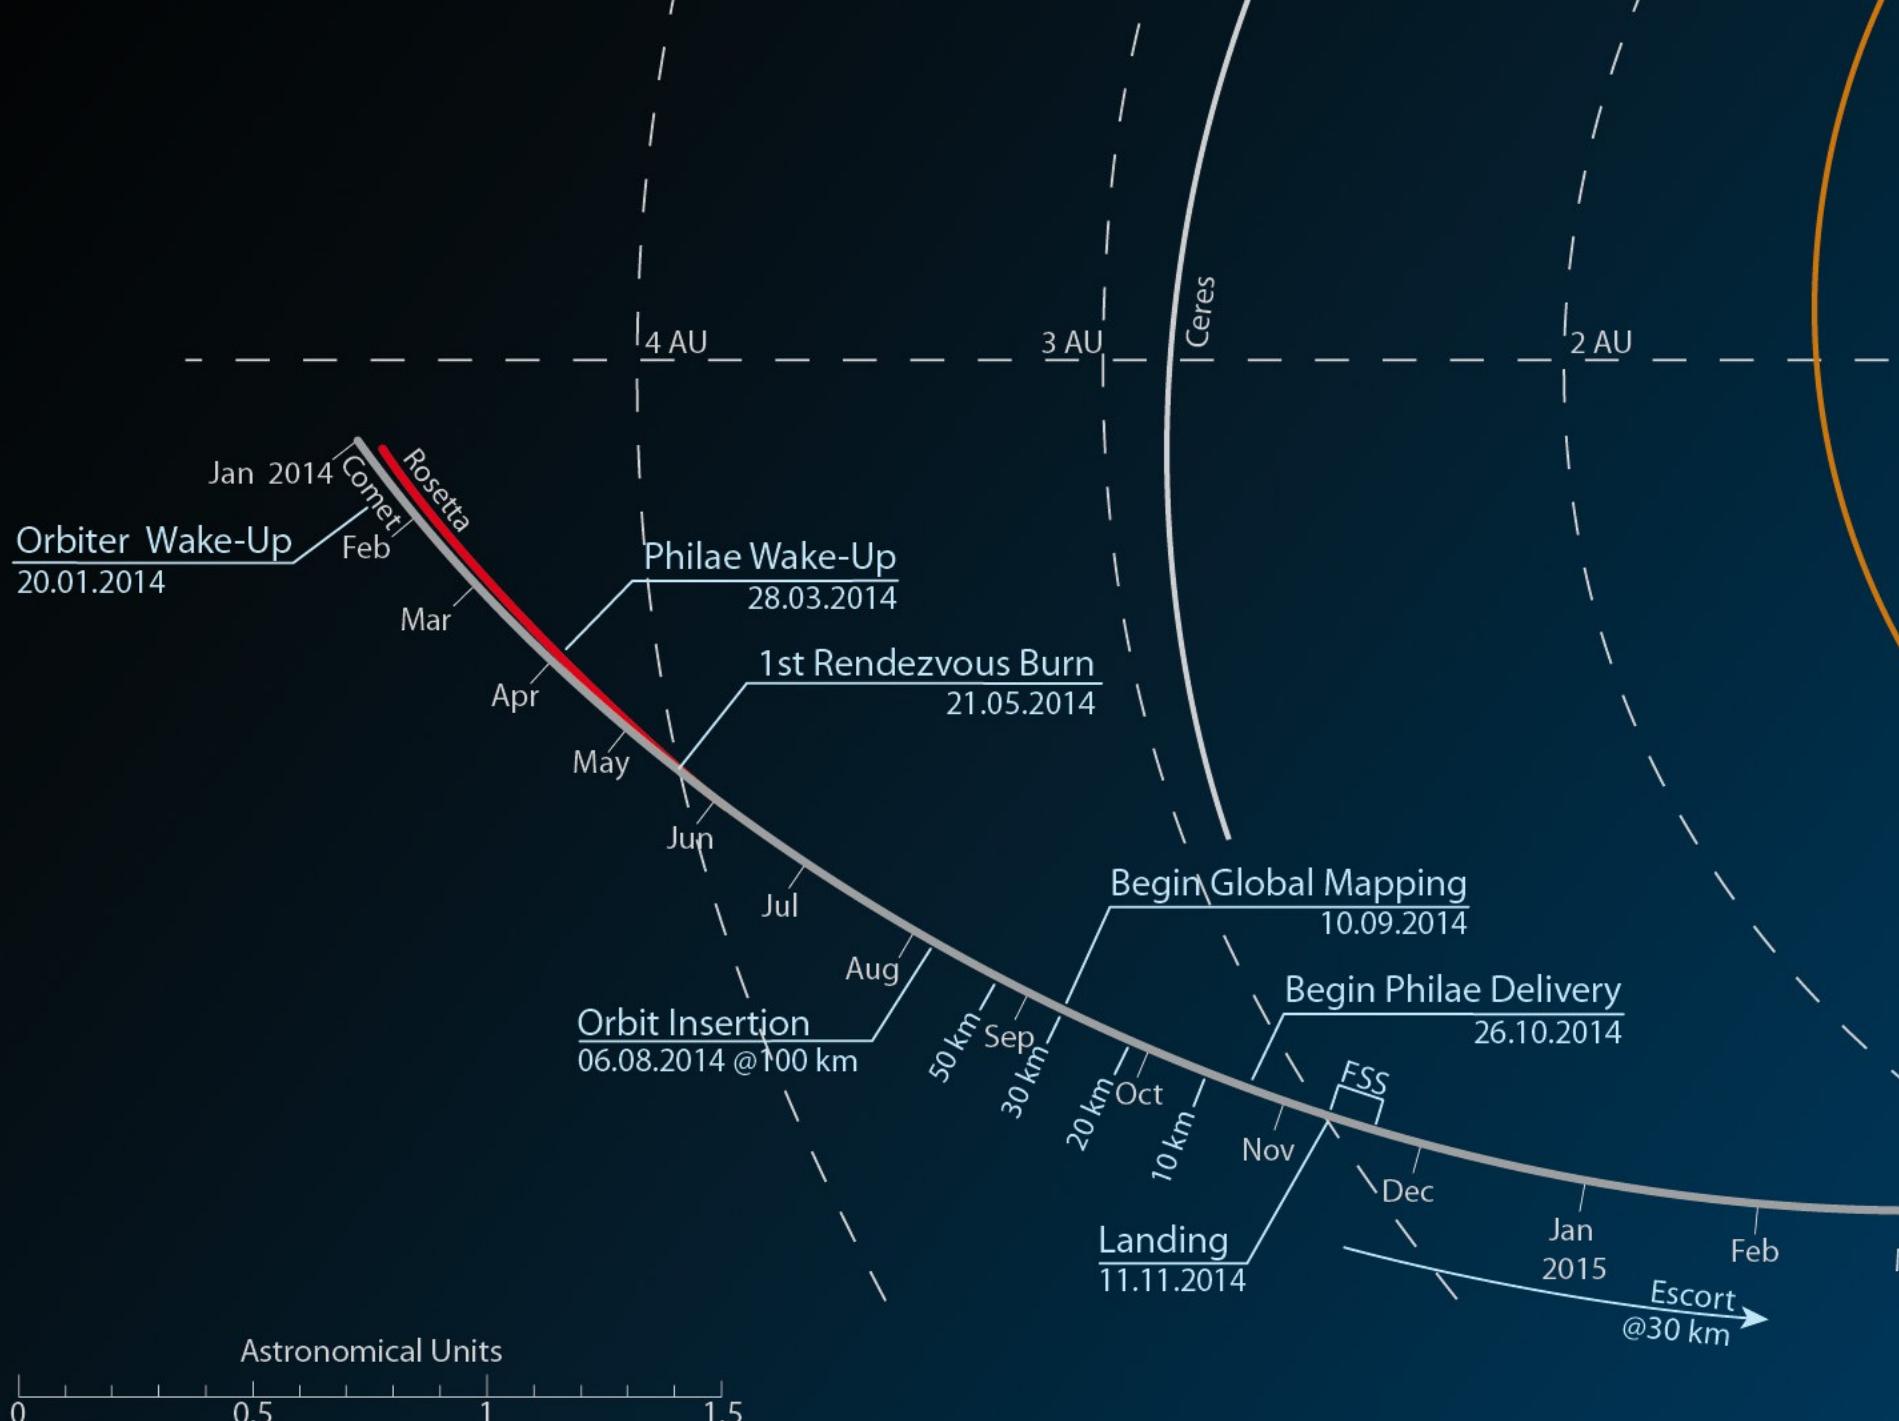

ESA's Rosetta orbiter
launched 2004
finally there...

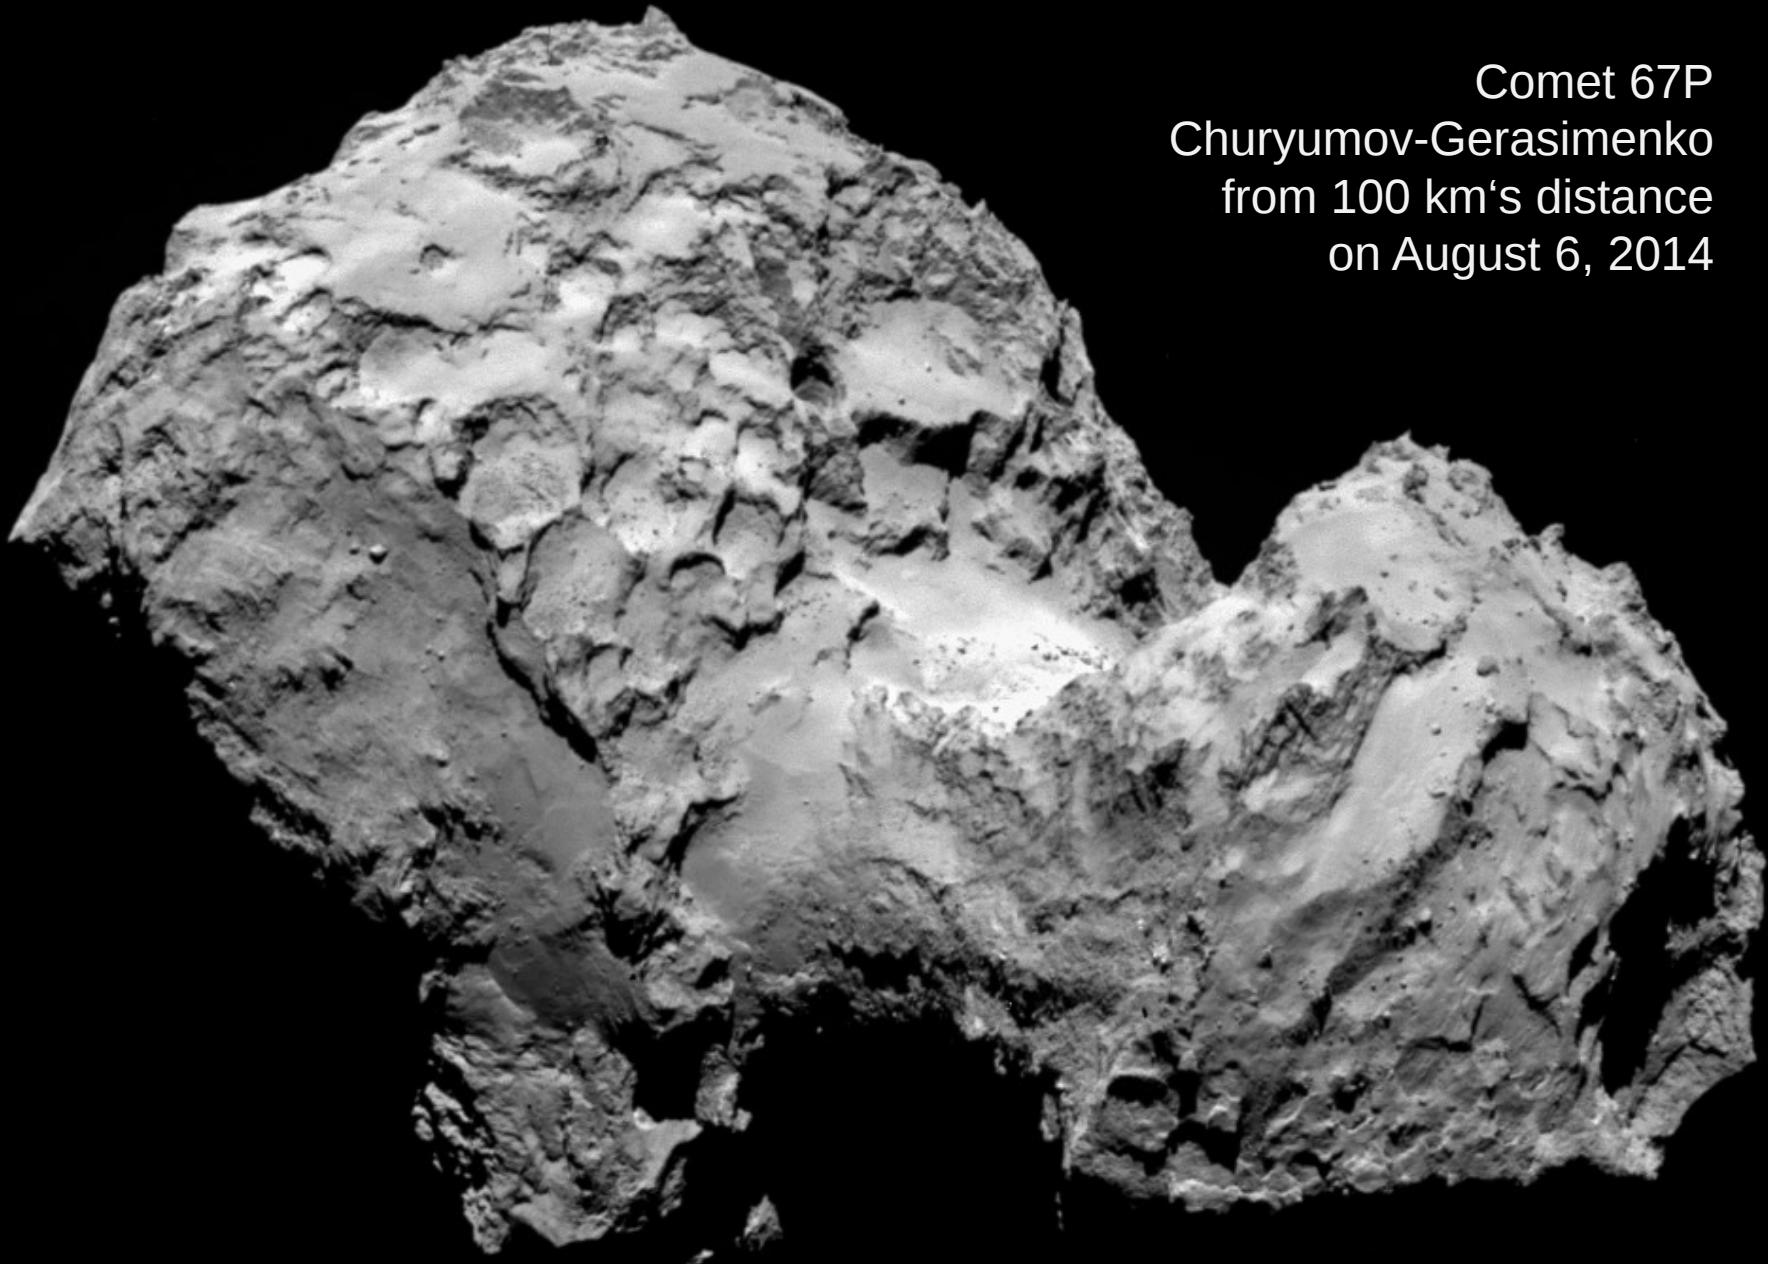

After 10 years Europe's comet chaser *Rosetta* reaches its target

Mission Rosetta 2014-2015

Comet 67P
Churyumov-Gerasimenko
from 100 km's distance
on August 6, 2014

Save the Date!

Tuesday, 11
November
2014

*Rosetta –
Philae
detachment
...and Philae
landing on 67P
about 7 hours*

11/11
Save
The
Date!

... and find a safe place for landing

*“get me a piece from the Moon, and I'll
explain you the universe!”*

(Harold Urey, Nobel laureate for chemistry 1934)

DLR – all around in the solar system...

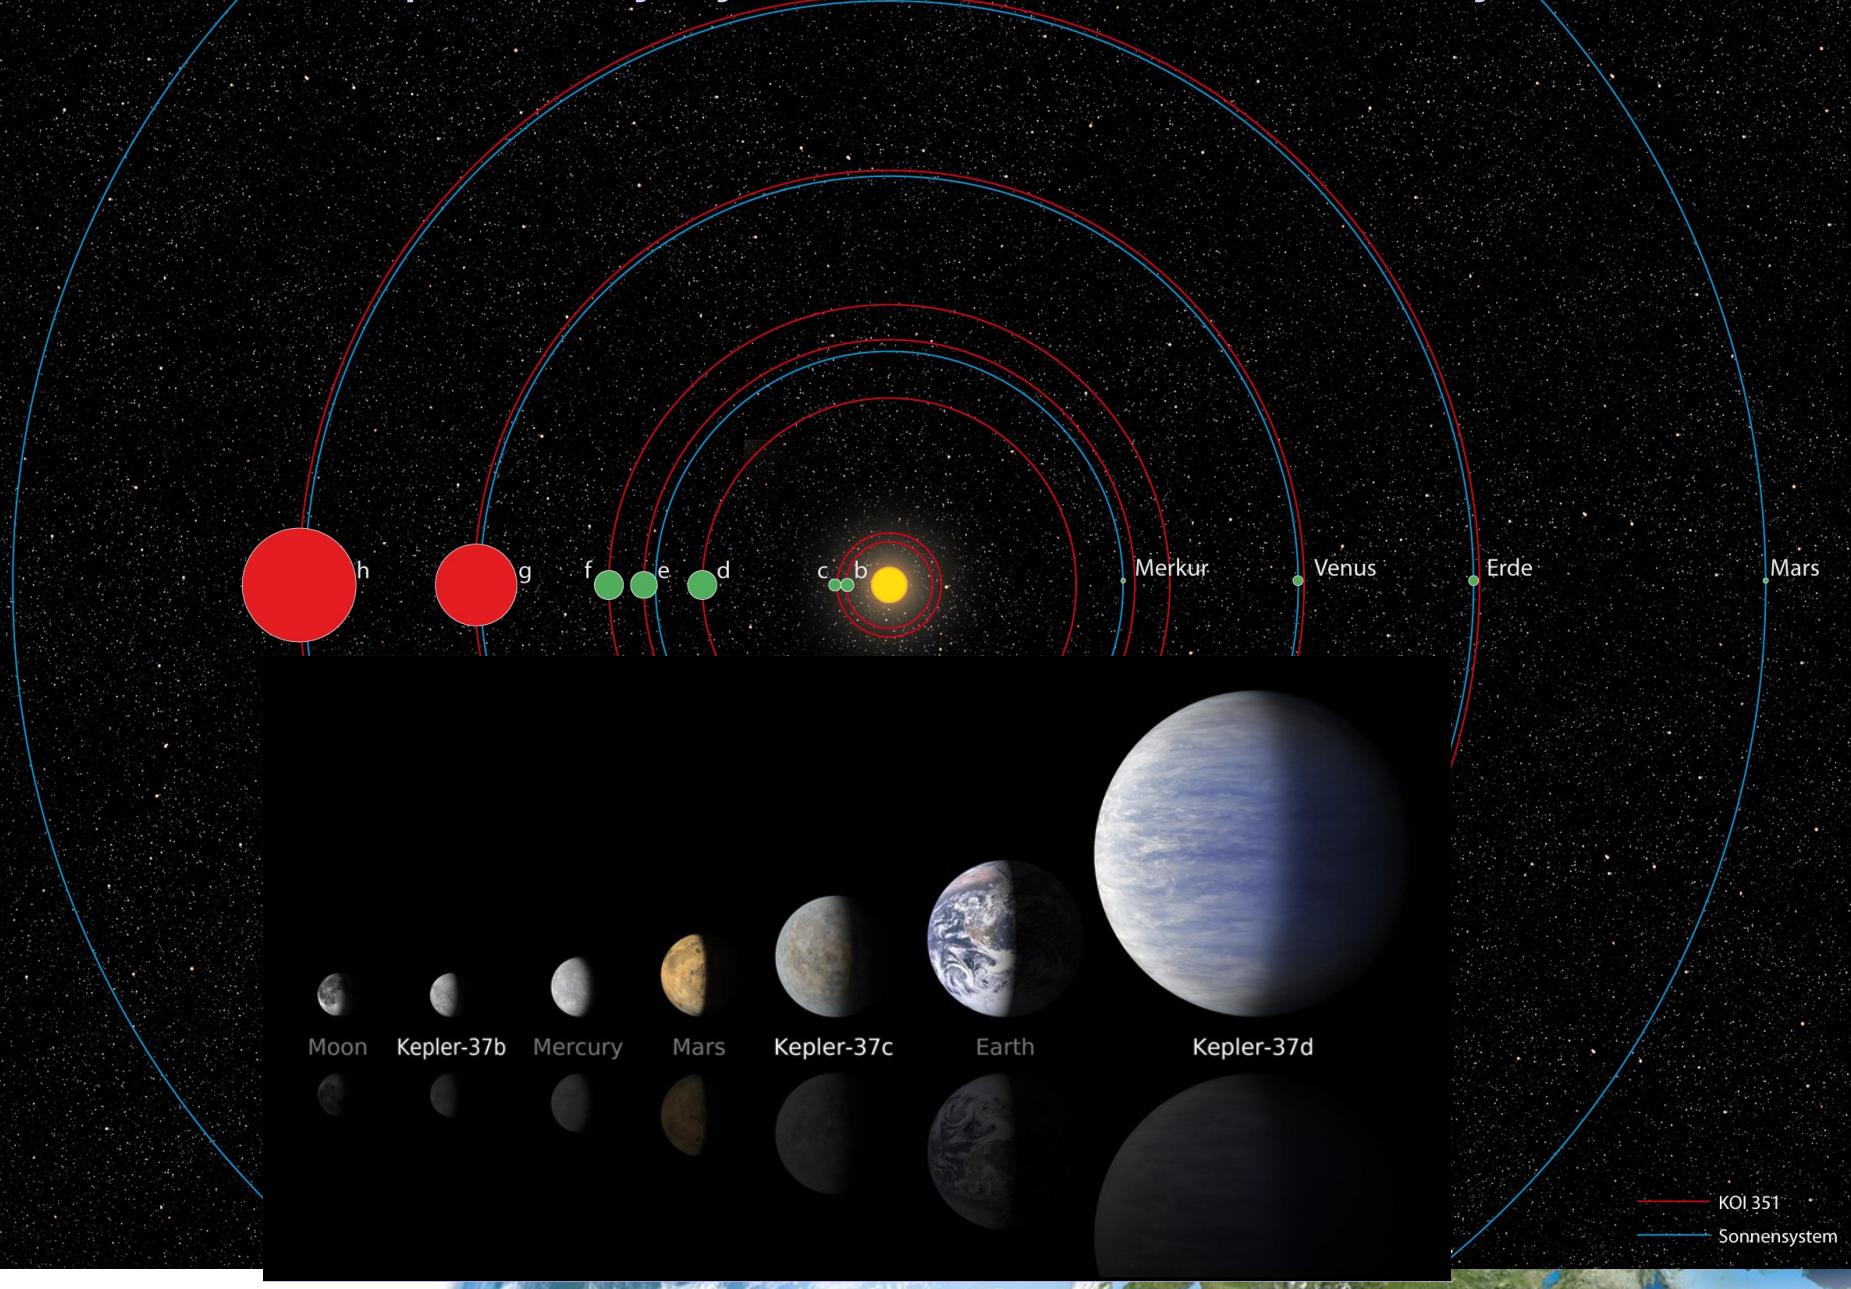

actual participation at ESA and NASA projects

- **Lunar Reconnaissance Orbiter** – NASA, Moon, until 2016
- **MESSENGER** – NASA, Mercury, until 2015
- **Venus Express** – ESA, end of 2014
- **Mars Express** – ESA, until 2016 or even 2018
- **Curiosity** – NASA's Mars Science Laboratory (MSL), at least 2022
- **Dawn** – NASA, Discovery Mission – Vesta + Ceres, end of 2015
- **Rosetta** – ESA, comet 67P/Churyumov-Gerasimenko, 2014/15
- **Cassini-Huygens** – NASA/ESA, Saturnian system, end of 2017
- **CoRoT** – space telescope, search for exoplanets, 2014 (†)
- **SOFIA** – NASA/DLR airborne IR Telescope
- **NeoShield** – EU how to protect our planet from Near-Earth Objects?

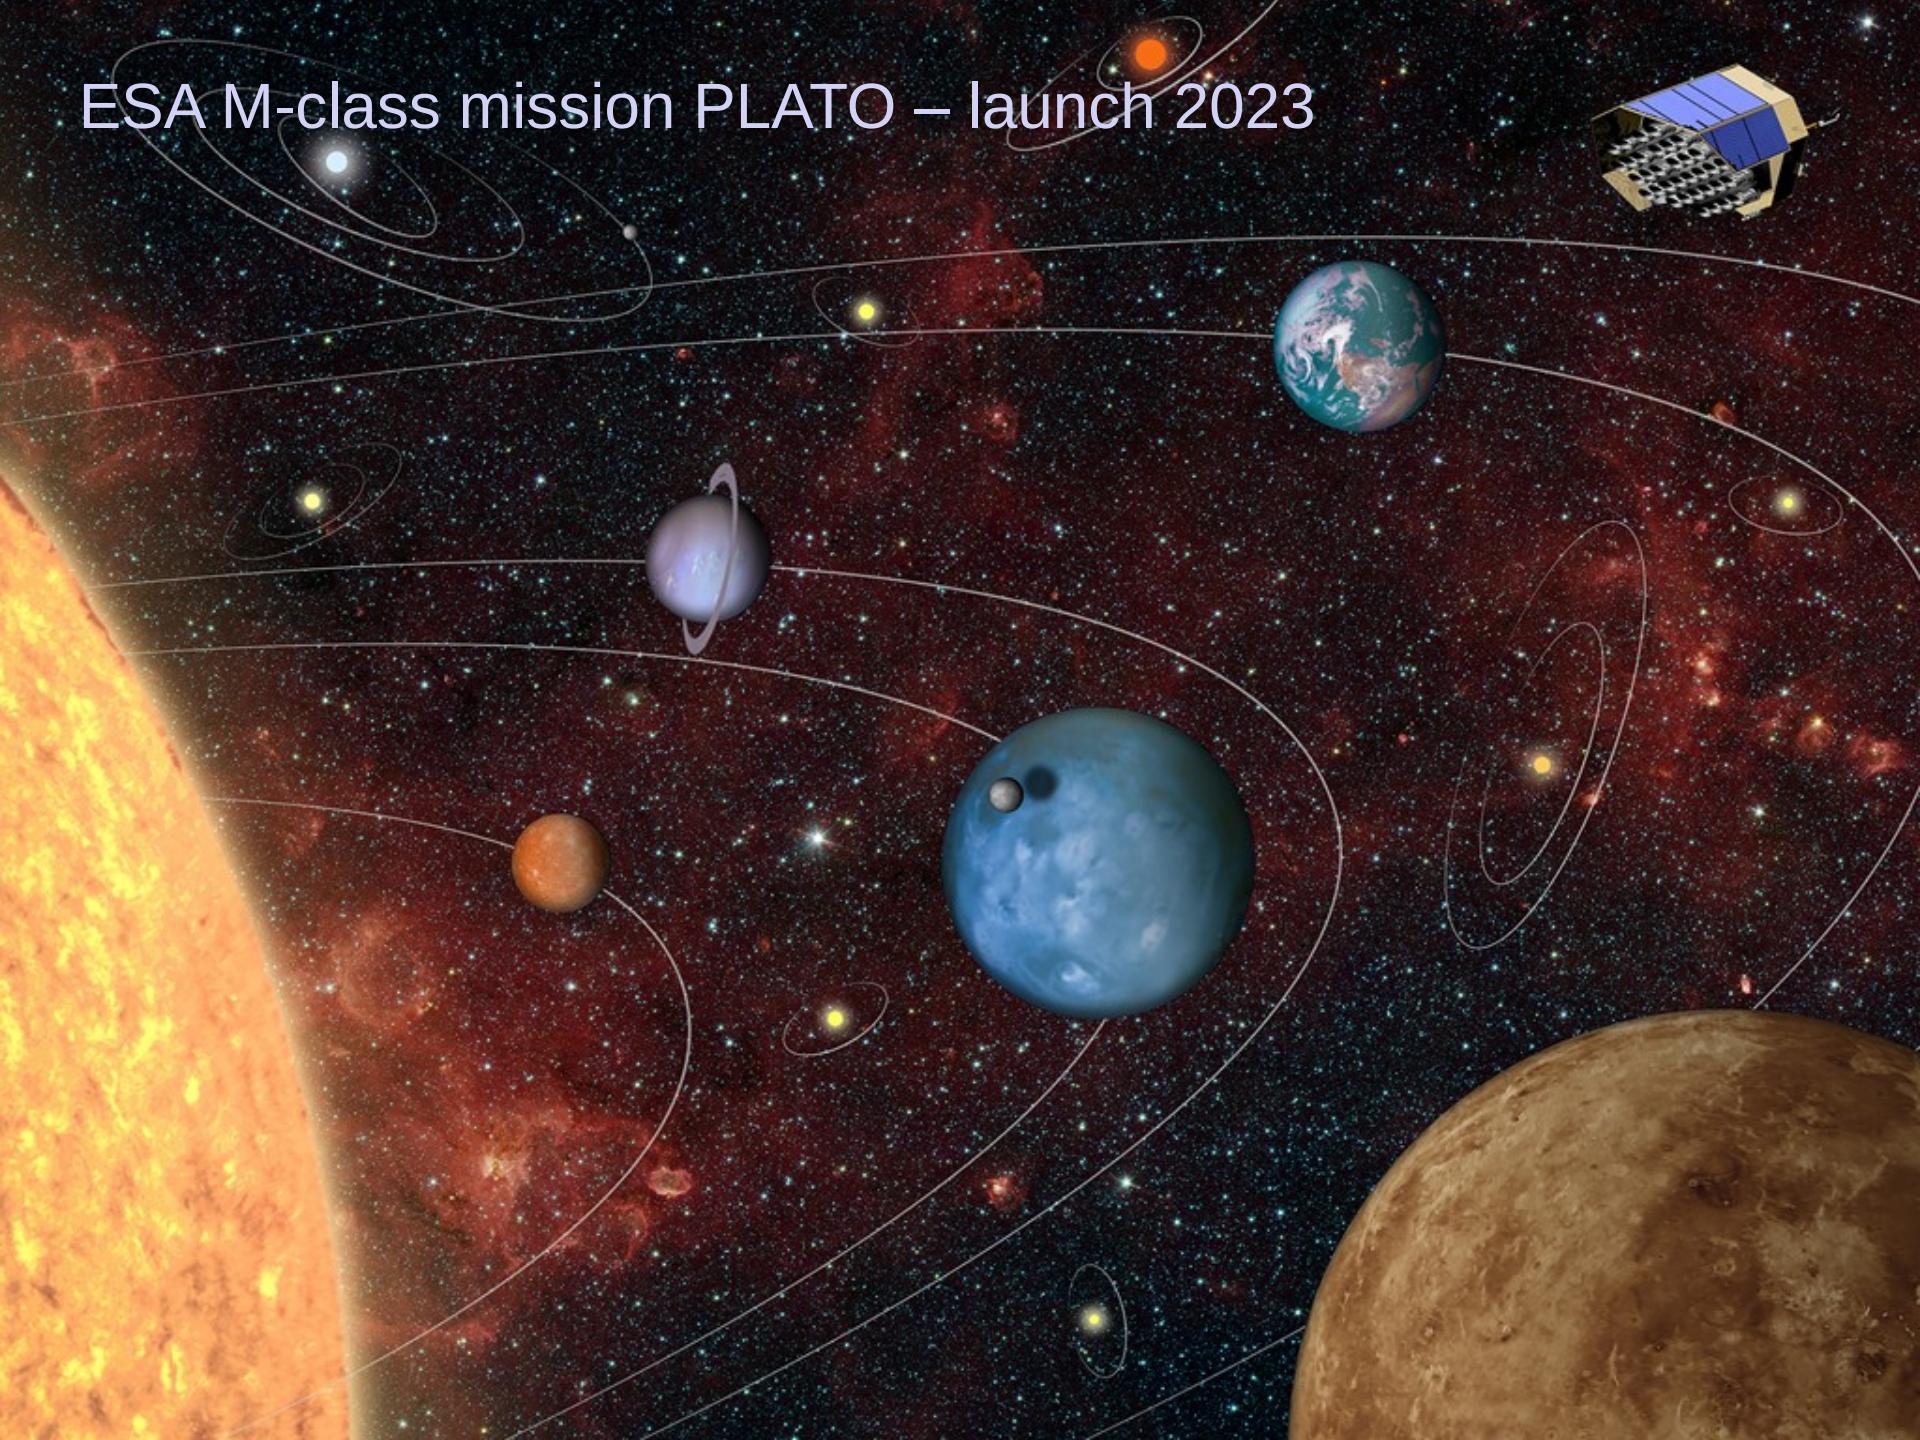

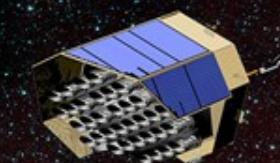

...what about tomorrow?

- **BepiColombo** – ESA, Mercury, launch 2016, arrival 2022/23
- **InSight** – NASA, Mars stationary lander, German/French payload; 2016
- **MASCOT** – lander for Japan's asteroid mission Hayabusa II, launch 2014
- **ExoMars** – ESA Orbiter und lander, 2016 and 2018, with Russia (?)
- **JUICE** – Jupiter Icy Moon Explorer, ESA – 2022 until ...2030!
- **PLATO** – ESA M-class mission in search for extrasolar planets: 2023
- **Marco-Polo R** – ESA M3-competitor, 2020 the earliest
- **Mars sample return** – we have a dream...

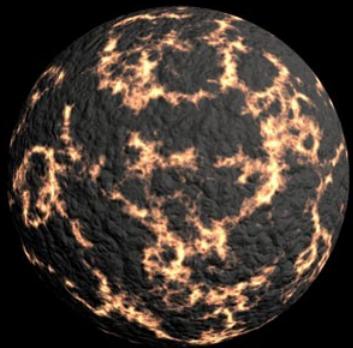

extrasolar planetary system KOI 351, our solar system

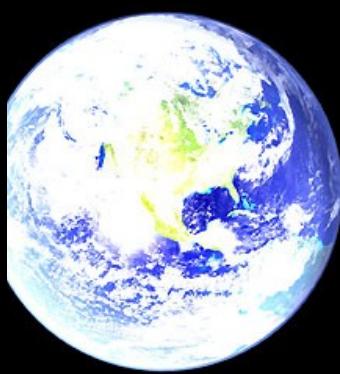

ESA M-class mission PLATO – launch 2023

It's one of the hottest topics in astronomy: searching Earth 2.0

magma

snowball

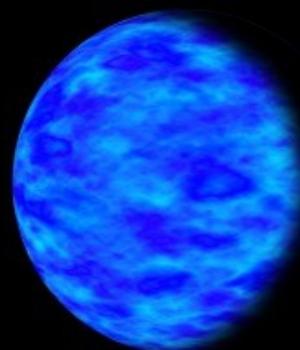

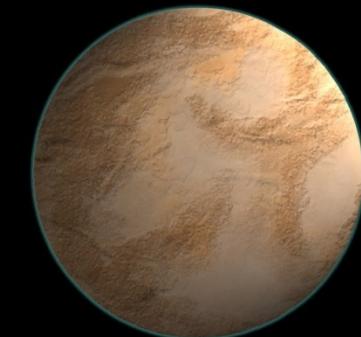

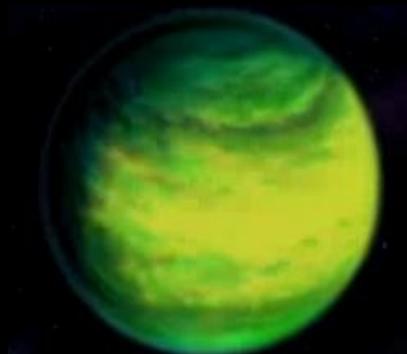

jurassic

young Mars

young Venus

dessert world

water world

super Earth

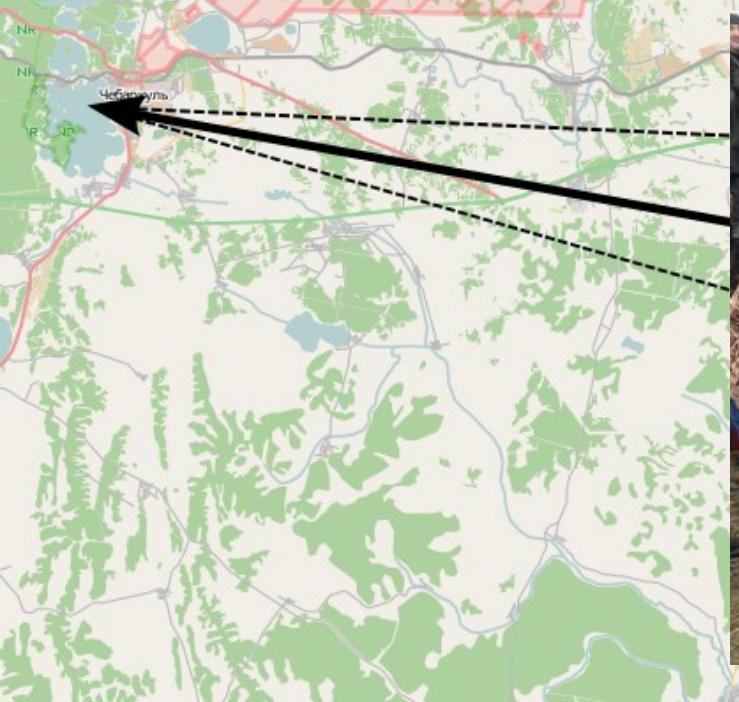

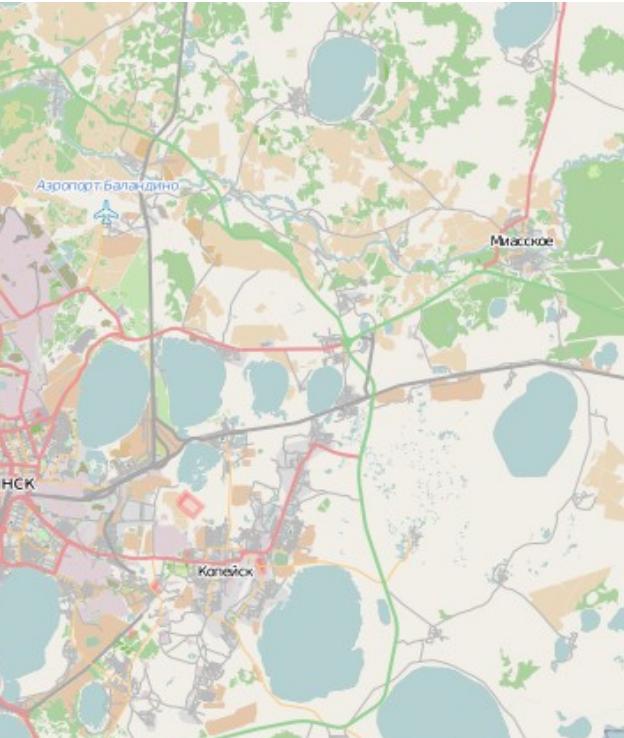

Whether we're alone in the universe: find out!
But there's definitely some dangerous stuff around

- Tscheljabinsk, 15. Februar 2013
Chelyabinsk bolide, 2013
DLR

n für Morgen

Lessons learned from Chelyabinsk:

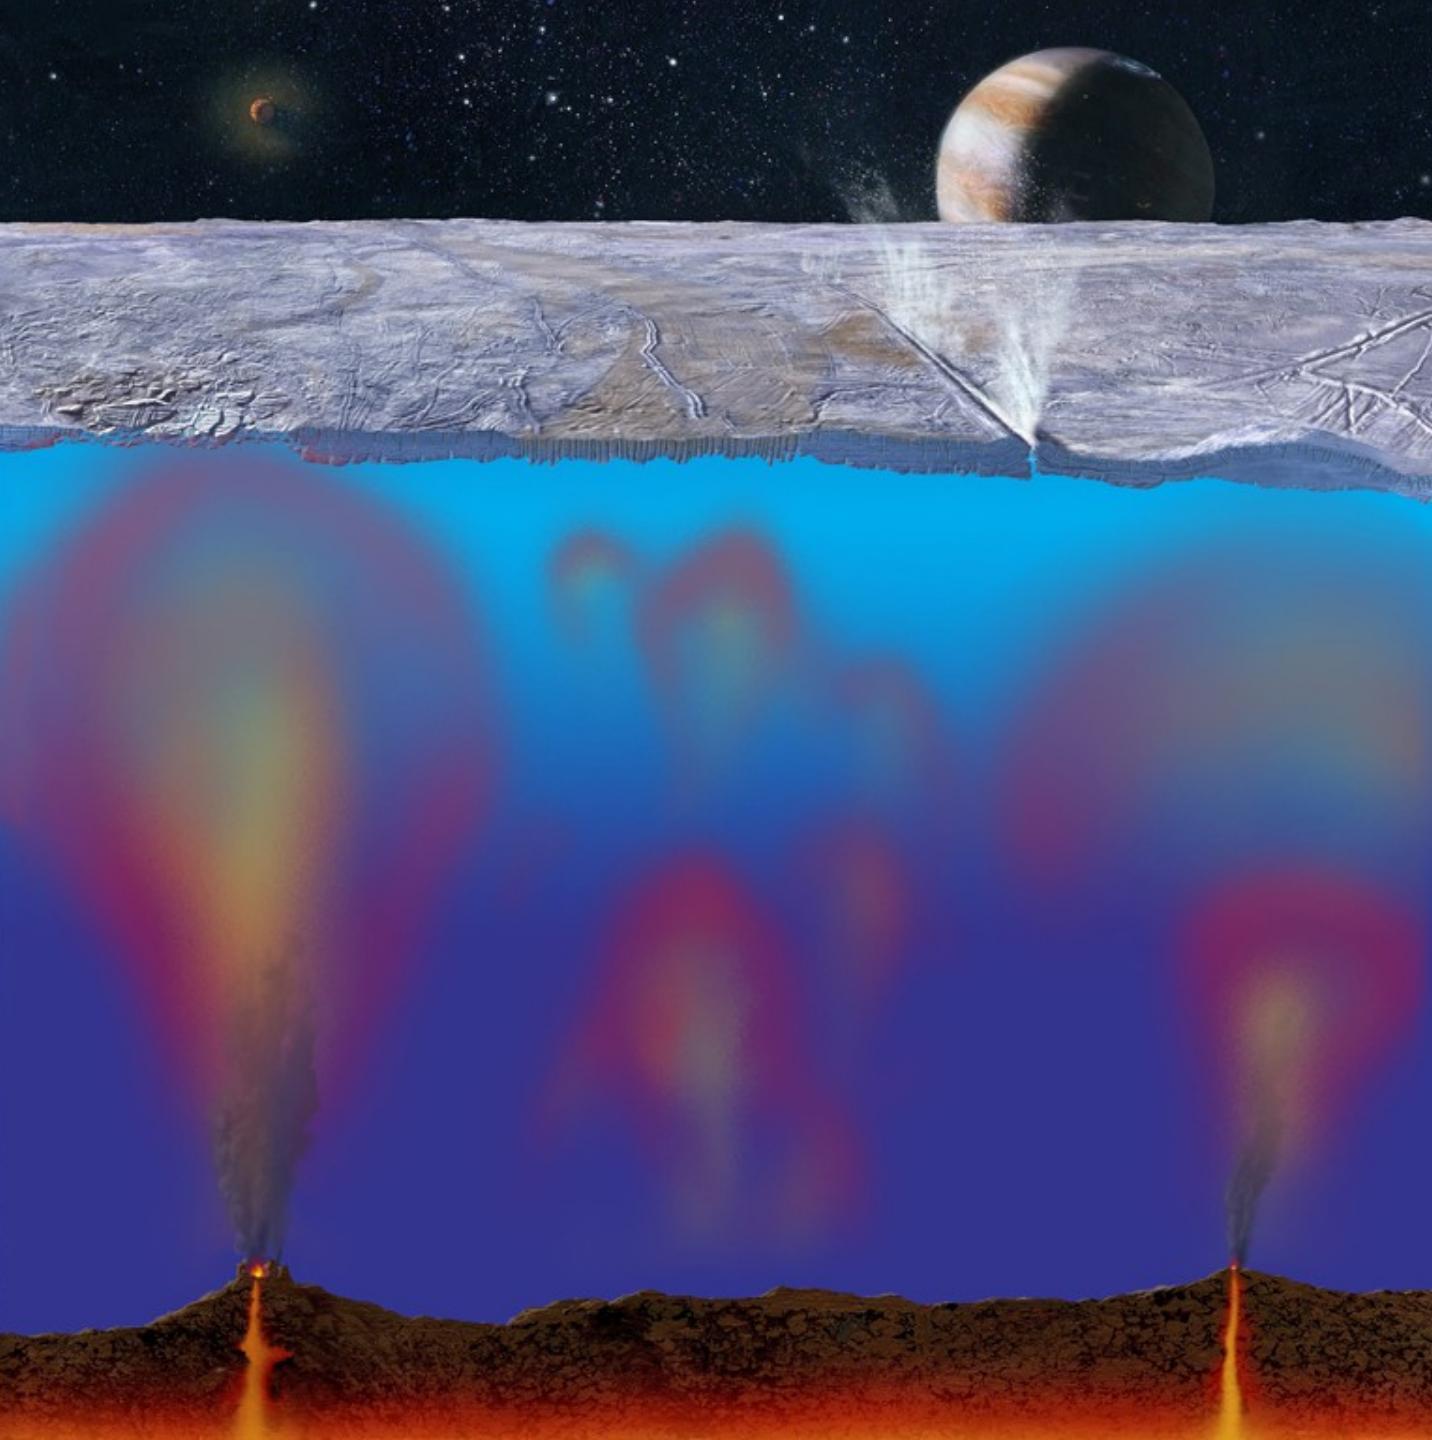

keep off the windows!!

Have some extra time...?
ESA mission JUICE
launch: 2022 – arrival: 2030

M. Carroll

Europa
a
sub-
crustal
ocean?
