

[isis_scripts.sl.tar.gz](#)

[event_lightcurves.tar.gz](#)

The first bundles up as separate scripts: psd_demo.sl, SITAR, isis_fancy_plots.sl, isis_utility_functions.sl, isis_utility_functions_prerelease_1.5.sl

. The last is separated out because it contains functions that will be in ISIS proper next release.

Please also install SLIRP for SED fitting session on Tuesday July 9:
