

Wireless access will be available at the conference. In addition to a conference WLAN, we will also make [eduroam](#) available. Eduroam offers the advantage of allowing you to connect to many university WLANs without any further authentication. If your institution is a [member of eduroam](#), this is therefore the preferred way to access the internet (note that the University of Bamberg is in eduroam, which means that in many restaurants and cafes in Bamberg WLAN access is available if these places are in the vicinity of University buildings...).

In addition, [our recommended hotels](#) offer WLAN at no or at only a modest charge.
